SACHIN SAHU

Aspiring Systems Engineer | Java Backend Development

Bhopal, Madhya Pradesh, India | +91 8085063123 | sachinsahuji306@gmail.com

LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.2) with hands-on experience building Java backend applications, REST APIs, and database-driven systems across two internships. Solved 160+ DSA problems on GeeksforGeeks and completed a JPMorgan Chase Software Engineering simulation. Strong foundation in OOPs, DBMS, Java, and SQL — seeking to bring this problem-solving ability to the Systems Engineer Trainee role at Infosys.

EDUCATION

Jai Narain College of Technology, Bhopal, MP Expected 2027

Bachelor of Technology (B.Tech), Computer Science — CGPA: 8.2 / 10

TECHNICAL SKILLS

Languages: Core Java, SQL, Kotlin, JavaScript, HTML/CSS

Core CS Concepts: OOPs, Data Structures & Algorithms, DBMS, Multithreading & Concurrency

Frameworks: Spring Boot, Hibernate/JPA, REST APIs, Microservices, Java Stream API, Collections

Databases & Messaging: MySQL, PostgreSQL, JDBC, Apache Kafka, Debezium (CDC)

Tools & Security: Git, Postman, Docker (Basics), Android Studio, Railway, Testcontainers, JWT, OAuth 2.0

EXPERIENCE

Java Development Intern (Associate L1) | *Infotact Solutions — Remote* May 2026 – Sept 2026

- Collaborated with the team to design, build, and deploy optimized Java backend applications.
- Developed and integrated secure RESTful APIs using Core Java, OOPs, and Spring Boot.
- Managed database modeling and query optimization via MySQL/PostgreSQL; resolved critical issues through debugging and code reviews for scalability and high availability.

Android Development Intern | *JNCT (Google for Developers) — Bhopal, MP* Jan 2025 – Feb 2025

- Built scalable Android applications using Kotlin, Jetpack Compose, and Firebase.
- Integrated remote REST APIs to ensure seamless frontend-backend data communication.

PROJECTS

ShadowBase – Zero-Downtime Schema Migration Sandbox May 2026 – Jul 2026

Tech Stack: *Java, Spring Boot, Apache Kafka, Debezium, Testcontainers, React*

- Developed a database sandbox using Java, Debezium (CDC), and Kafka to shadow and replicate live SQL traffic; integrated Testcontainers to spin up isolated, Dockerized clones for safe query replay.
- Built a high-throughput stream replayer using Java Stream API to execute live transactions against clone schemas, with a React + Monaco Editor dashboard to write scripts and monitor error rates.

GridWeaver – Virtual Thread IoT Microgrid State Engine Jul 2026 – Sept 2026

Tech Stack: *Java 21 (Loom), Spring State Machine, Apache Kafka, React, Leaflet*

- Engineered a high-concurrency TCP/WebSocket ingestion engine using Java 21 Virtual Threads to handle 50,000+ non-blocking IoT telemetry pings, buffered via Apache Kafka to prevent backend bottlenecks.
- Integrated Spring State Machine to manage dynamic battery node transitions (Charging, Discharging, Idle, Fault); built a React + Leaflet GIS dashboard for live grid stability visualization.

CERTIFICATIONS

- Software Engineering Job Simulation — JPMorgan Chase (Forage), Oct 2025 — project setup, Kafka & H2 integration, REST API development.
- Java Full Stack Developer Intern — EduSkills Academy, Mar 2026 — built end-to-end apps using Spring Boot, Hibernate, and MySQL.
- GeeksforGeeks 160 DSA Challenge Certificate, Jan 2026 — core Data Structures & Algorithms problems.
